

MYSUSTAINABLEFOREST INSIGHT SERIES #2

TRAINING FORESTRY END-USERS ON EARTH OBSERVATION-BASED SOLUTIONS

ONLINE WEBINAR, 22 SEPTEMBER 2020

This webinar aims at training forestry end-users on the use and application of the remote sensing-based forestry services developed by MySustainableForest Project during the past three years. These services (e.g. forest characterization, biodiversity, ecosystem services estimation) integrate Earth Observation information (satellite data, LiDAR) with key forestry variables (e.g. forest species and stands) as to enhance sustainable forest management across Europe. User Guides and Short Demos will be provided. This webinar is a Partner Event of the Green Week 2020, organised by the European Commission.
